

3DHISTECH – Company Profile

3DHISTECH is one of the pioneers in whole slide imaging (WSI), developing high-performance hardware and software solutions for digital pathology with more than 25 years of experience in this field. We offer complete solutions from sample preparation including robust TMA block creator machinery through award-winning brightfield and fluorescent digital slide scanners to automated quantification, web-based teleconsultation and 3D reconstruction software, covering the whole pathology workflow.

As the first European manufacturer, 3DHISTECH is one of the market leaders in the world with around 4000 systems sold.

We also have hundreds of systems in use in pharma field. We would like to return with our new developments after clinical deployment and have new systems for the veterinary field.
